COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Commissioner for Patents:

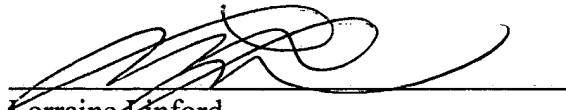

Applicants thank the Examiner for allowing claims 13-22 and 24-43 in the present application. Applicants wish to comment, however, on the Statement of Reasons for Allowance. More particularly, applicants wish to clarify that the quick release mechanism is not required for the patentability of the claims, and in fact, is only recited in dependent claims 3 and 14. The subject matter of the remaining allowed claims is not dependent on the inclusion of a quick release mechanism. For example, the arrangement wherein the clamp holds the cutting head assembly when the nozzle body assembly is separated from the cutting head assembly, and the arrangement wherein the cutting head assembly is held in place when the nozzle body assembly is separated from the cutting head to allow access to the orifice without removing the cutting head assembly from the clamp, are independently patentable. Applicants therefore respectfully

Application No. 09/940,689
Reply to Office Action dated September 23, 2004

submit that the subject matter of each allowed claim defines patentable subject matter, some of which include a quick release mechanism, and some of which do not.

Respectfully submitted,

SEED Intellectual Property Law Group PLLC
